# Brand Identity

## movement enhances your mountain ride.

In the heart of the Swiss Alps, where snow-capped peaks reach for the heavens, a tale of passion and innovation unfolds. This is the story of Movement, a brand that embodies the essence of the international Swiss style, uniting skiers from every corner of the globe.

Movement's journey begins with a simple yet audacious dream: to create skis that would become an extension of the skier's soul. Guided by a relentless pursuit of excellence, Movement set out to craft skis that could conquer any mountain, ignite the spirit of freedom, and leave an indelible mark on the world of skiing.

### *the manufacture*

What sets Movement apart is its unwavering commitment to independence. Breaking free from the constraints of mass production, Movement established its own manufacture, where every ski is meticulously crafted with the utmost care and precision. From the selection of the finest materials to the hands of skilled artisans, each pair of skis becomes a work of art, a testament to the brand's dedication to perfection.

### *the tribe*

But Movement is more than just a brand; it is a way of life. The Tribe, as they are lovingly called, encompasses everyone who is part of the Movement family. From the designers and engineers to the athletes and ambassadors, the unique experience and passion of each member contributes to the brand's vibrant image.

### *the swiss style*

The international Swiss style flows through the veins of Movement, infusing each ski with the perfect balance of performance and elegance. From the Swiss Alps to the peaks of the Rockies and beyond, skiers around the world embrace Movement, knowing they are part of a global movement that celebrates the art of skiing.

### *the ride*

Join the Tribe, become part of the Movement family, and let passion reign as you carve your path through snowy landscapes. Embrace the international Swiss style, where precision meets beauty, and let Movement be your trusted companion on every exhilarating descent.

**Adventure awaits, and Movement is here to guide you through every turn, every jump, and every moment of pure exhilaration. Together, let us write the next chapter of Movement's extraordinary journey, where the love for skiing knows no bounds.**

**Welcome  
To the  
Tribe.**

INNOVATION IS OUR DAILY DRIVER

# Tech Infos

## FIBERS

3 axis fiberglass for stability and playfulness.

2 axis flax fiber for optimum force transmission and high damping properties.

2 carbon axis blended with fiberglass for improved torsional stiffness and confort.

Full carbon for ultralight skis with excellent skiability. The Movement secret recipe.

## WOODCORES

Handmade woodcore with Paulownia for light and efficient skis.

Handmade woodcore with our lightest selection of Poplar for the most technical skis.

Handmade blend of Paulownia and Poplar for increased skiability and control.

Handmade woodcore with our selection of Poplar for the most powerful skis.

## EDGES

Ultralight edges for the technical skiers out there.  
1.7mm x 1.5 mm profil

Light edges for our ski touring series.  
1.7mm x 2.0 mm profil

Most durable edges for demanding conditions.  
2.0 mm x 2.0 mm profil

## BASES

Best gliding performance with P-tex 4500 base.

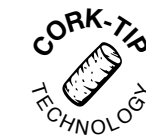

Durability and versatility with P-tex 3000 base.

**NEW**

From 2024-2025 season, Movement is proud to collaborate with swiss cleantech company Bcomp. A full new series of skis will incorporate a technical flax fiber layer. Flax fiber's lightweight strength enhances ski agility and precision, while its natural damping properties reduce fatigue and improve control on diverse terrains. Additionally, it's an eco-friendly choice for ski manufacturing, promoting sustainability in the industry.

100% natural from Spain, the cork-tip technology replace the plastic ABS tip spacer. Better vibration dampening and smoother skiability.

All Movement skis are now manufactured with a double titanal and fiberglass reinforcement plate to ensure power transmission and a durable binding system.

# FLY

## SERIES

### upcoming revolutionary movement

Creative and playful, the FLY Series is designed for aesthetic and aerial freedom of movement. Creative, inspiring, aerial, FLY reveals the playful and non-conformist aspect of freeskiing. With a smoother flex and lighter construction this year, it is the instrument of its artistic dimension, from the radical shred to the spectacular flights, as comfortable on the piste as in deep snow. With a freetouring set-up, it becomes a complete ski, capable of going for the subtleties of the terrain with the strength of the legs. Both light and resistant, thanks to its poplar core, it can easily be used for ski touring to explore more distant playgrounds. The movement is graceful, the mountain a playground.

90

The Alp Tracks 90 is a remarkable climber with exceptional skiability. Sidewall construction, front rocker, secure heel, and an athletic shape, to go on the mountain with skis that are maneuverable in narrow pathways, sharp on hard snow and very comfortable in tracked snow and powder. With 90 mm full carbon underfoot, it embodies the new Alp Tracks ski experience perfectly.

**drybase**  
All Colltex ski skins are now coated with the newly developed «Drybase» special coating. This coating on the back of the fabric prevents water from penetrating and keeps the skins dry and light. Furthermore, this treatment creates an optimal chemical bond with the hotmelt glue. As a result, the glue adheres optimally to the back of the ski skin and it is very difficult for the glue to tear off. With this innovation, ski tourers benefit from even better performance on the mountain.

**100% SYNTHETIC - HOTMELT**  
With these ski skins Colltex launches a purely synthetic model of the latest generation. The new fibre developed by Colltex achieves optimally improved results in terms of climbing and gliding properties. The raw material is produced in a Swiss spinning mill and allows individual printing even in small quantities. The ski skins are addressed to beginners and all-round ski tourers who expect a reliable hold with appealing gliding properties at the same time.

# FREETOUR

SERIES

With its EMS Grilamid polyamide construction and 3-part collar, the FREETOUR offers a significant gain in terms of strength and force transmission. This boot offers an excellent hold while using wide skis. The “Fly” ski/walk system reinforces the shell for more powerful back support. Designed for ski tourers who prefer precision in descent, the FREETOUR is a more direct shoe in transitions, performing in all conditions.

# PERFORMANCE

SERIES

With its focus on lightness and performance, this series of ski boots lives up to its name. The use of EMS Grilamid polyamide provides weight savings and excellent performance in all outdoor conditions. The buckle is lightened to the maximum, without losing performance or reliability. He 3-part collar of-fers superior support and precision when descending. The “Fly” ski/walk system reinforces the shell for better rear support. With over 60° of travel, there are no limitations on uphill movement.

3TECH ALPI  
HONEYCOMB

Our triple-standard, multi-function helmets are approved for skiing, mountain biking, road biking and climbing. Refined materials for a streamlined look, comfort for every use and optimum safety thanks to ABS side reinforcements sandwiched between each side of the helmet. As for temperature, the efficient ventilation system regulates air flow during exercise. Two interiors are supplied with the helmet. A lightweight liner for summer use (cycling and mountaineering) and a lined liner for winter use. A lycra headband is also supplied to resist the cold on the 3TECH ALPI HONEYCOMB.

new 3TECH HYBRID  
BLACK EDITION

Our triple-standard, multi-function helmets are approved for skiing, mountain biking, road biking and climbing. Introducing the 3Tech Alpi Hybrid Black Edition, a pinnacle in hybrid skiing technology. Engineered with refined materials for a sleek and streamlined appearance, this helmet is the epitome of style meets functionality. Experience unparalleled comfort tailored for various activities, with ABS side reinforcements ensuring optimal safety in every adventure. The efficient honeycomb ventilation system keeps you cool during intense exercise. This versatile helmet comes with two interchangeable liners – a lightweight option for summer pursuits like cycling and mountaineering, and a lined version for winter escapades.

# ALPI RACE

2 4 L

Our ALPI RACE 24L backpack was developed in collaboration with our best athletes competing in the ski mountaineering world cup. Some of the features that set it apart from the classic touring backpack are its fast ski carrying system (two pairs), crampon compartment, removable helmet net, ice axe attachments, water bottle holder, pull loop and other accessories.

# BACKCOUNTRY

3 0 L

The 30L BACKCOUNTRY backpack was optimized by us for Freeride and freetouring riders. The access to your safety gear is fast and intuitive, the numerous adjustable possibilities bring it more comfort with various solutions for carrying skis. It's 30 litres volume. It gives you a wide range of use, as much for your weekend ski tour as for your most beautiful committed line.
