# COLLECTION

The new collection emphasizes clarity in practices segmentation and embodies timeless Swiss-style design, blending precision with elegance. The ski production has been moved to a new factory in Europe, marking a significant shift and ushering in a new era for the brand.

25  
26

The reflection of our dedication to innovation and simplicity, showcasing a refined lineup designed to meet the needs of every skier.

In the heart of the Swiss Alps, where snow-capped peaks reach for the heavens, a tale of passion and innovation unfolds. This is the story of Movement, a brand that embodies the essence of the international Swiss style, uniting skiers from every corner of the globe.

Movement's journey begins with a simple yet audacious dream: to create skis that would become an extension of the skier's soul. Guided by a relentless pursuit of excellence, Movement set out to craft skis that could conquer any mountain, ignite the spirit of freedom, and leave an indelible mark on the world of skiing.

## SERIES

### A GRAVITY SERIES

Creative and playful, the FLY Series is designed for aesthetic and aerial freedom of movement. Creative, inspiring, aerial, FLY reveals the playful and non-conformist aspect of freeskiing. With a smooth flex and a light construction, it is the instrument of its artistic dimension, from the radical shred to the spectacular flights, as comfortable on the piste as in deep snow. The movement is graceful, the mountain a playground.

### AN ELEVATION SERIES

The ultimate experience of Movement agility, ALP TRACKS embodies the top of the line in mountain skiing. A concentrate of technology, materials selected according to strict weight criteria for unlimited freedom of movement. Crafted with premium materials, these skis are engineered for those who seek the thrill of reaching peaks with unmatched precision. The full carbon construction sets a new standard in performance, ensuring every stride is met with maximum efficiency and agility. This year, a brand-new shape has been introduced, further enhancing the ski's versatility and performance across diverse terrains.

## drybase

All Colltex ski skins are now coated with the newly developed «Drybase» special coating. This coating on the back of the fabric prevents water from penetrating and keeps the skins dry and light. Furthermore, this treatment creates an optimal chemical bond with the hotmelt glue. As a result, the glue adheres optimally to the back of the ski skin and it is very difficult for the glue to tear off. With this innovation, ski tourists benefit from even better performance on the mountain.
